SUMMARY

Product manager with 4 years in AI product delivery, quality assurance and technical support. At Agile Loop, led AI agent products for Lenovo and Qualcomm and data QA for agent training. Also builds and ships web products hands-on: field-service SaaS, RAG assistants, AI agents and workflow automation.

SKILLS

Product: product requirements (PRDs), roadmaps, feature prioritisation, user research, stakeholder management, Agile/Scrum

Quality: software testing life cycle (STLC), test planning, test case design, functional and regression testing, UAT, bug reporting, data QA

Technical: Python, FastAPI, REST APIs, Next.js, React, TypeScript, Supabase, PostgreSQL, Firebase, n8n, LangChain, LangGraph, RAG, ChromaDB, WhatsApp Cloud API, Selenium, Postman, Git, Linux

Tools: Jira, ClickUp, Notion, Asana, Slack, Figma, Google Sheets, Excel

EXPERIENCE

Founder, Sequence Automate — Apr 2026 – Present
AI automation agency for B2B clients — *Islamabad (remote)*

- Run an AI automation business: AI agents, RAG assistants, workflow automation and custom web software, built with n8n, LangChain, Supabase and the WhatsApp Cloud API.
- Delivered a poultry farm management system for a company in Oman (flocks, daily records, sales, receivables, invoices, reports; English, Arabic, Urdu), handed over with a user manual and acceptance checklist.
- MediCloud Billing Solutions (US medical billing): website audit, Elementor hero redesign, SEO/AEO content strategy and a digital growth plan.
- Built a RAG pipeline over fault tree analysis documents for an industrial engineering use case, and automated GitHub Actions backups for a production Supabase app.
- Run sales and delivery end to end: lead generation, scoping, build, testing and handover.

Product Manager, Agile Loop — Apr 2024 – Jan 2026
AI agents and enterprise AI solutions — *Islamabad*

- **SAM for Lenovo**, an autonomous screen-control AI agent for desktop and browser apps: owned feature listing, research, architecture input, testing and QA, and client reporting; led the team handling data collection, annotation, cleaning and data QA.
- **SAM-X for Qualcomm**, an Excel automation AI agent: ran data collection, testing and QA, and feature enhancements.
- **TERA**, an AI app builder that generates mobile apps from natural language: built prototypes, contributed to the architecture, and ran testing and QA.
- Managed client communication and delivery for NTDP (Saudi Arabia), a ministry CRM with AI analytics.
- Introduced ClickUp, Slack, Notion and Sheets tracking across engineering, design and data teams; wrote technical assessments used in hiring.

QA Lead, Data Acquisition, Agile Loop — Aug 2023 – Mar 2024
Training data for Large Action Models — *Islamabad*

- Led the QA team to 90%+ data accuracy and reduced errors by 12% across large-scale data projects.
- Led annotation and QA for the Mind2Web dataset: 20,000 real-world task episodes across travel, shopping, services, entertainment and information.
- Collected and validated complete screen flows from 10+ applications for model training.
- Designed QA and testing protocols; ran functional testing on internal tools and filed bug reports with suggested fixes.

Senior Support Engineer, Apollo Telecom (Pvt) Ltd — Feb 2023 – Oct 2023
Promoted from Technical Support Engineer within 6 months — *Islamabad*

- Main support contact for Ufone and PTCL systems (Hashcube, WebChat, Customer Care) and the Huawei IVR for DGI&P.
- Reduced response times by 25%+ and met 85%+ of KPIs within SLA through streamlined support processes.

- Worked with engineering on root-cause fixes and stability improvements; mentored junior engineers.

Technical Support Engineer, Apollo Telecom (Pvt) Ltd Aug 2022 – Feb 2023

- Reduced recurring issues by 33% with new troubleshooting procedures and standard documentation.
- Supported outage restoration and system upgrades with cross-functional teams; trained new hires.

PROJECTS

VerifyOps | Field service management SaaS *Next.js*, *Supabase*, *Stripe*

- Request-to-payment system for HVAC, plumbing and electrical businesses: quotes, scheduling, dispatch, technician app, photo evidence, QA and invoicing. Invoicing is blocked until job evidence passes review.

StableClose | Stablecoin accounting SaaS *Next.js*, *Supabase*, *Vitest*

- Reads company wallets across 7 blockchains (read-only), matches USDC/USDT payments to invoices and prepares the month-end close; 35 automated tests passing.

Smartcard Navigator | RAG credit-card assistant (Mashreq Bank use case) *FastAPI*, *ChromaDB*, *OpenAI*

- Answers questions on UAE credit cards from 25 official bank and Central Bank documents, citing the source; includes statement analysis and card comparison.

Travello AI | Travel booking agent *LLM agent*, *tool calling*

- Chat-based travel concierge that plans the trip, asks for missing details, and searches live flights and hotels to show bookable options.

LeadZ | B2B lead generation from public data *React*, *Supabase*

- Finds companies matching an ideal-customer profile in public sources (GLEIF, Wikidata, Wikipedia), then enriches, de-duplicates and exports them with evidence.

DocForge AI | AI document generation SaaS *Next.js*, *Supabase*

- Web app that generates business documents with AI.

EDUCATION

BE Electrical Engineering, National University of Modern Languages (NUML) Jun 2022

- Final-year project: gimbal-based robotic eye with ESP32-Cam real-time object tracking, full hardware prototype and 3D model.

CERTIFICATIONS

- McKinsey Forward Program, McKinsey & Company (Jul 2025)
- Google IT Support Professional Certificate, Google (Jan 2023)
- Google IT Automation with Python courses: Crash Course on Python, Using Python to Interact with the OS, Configuration Management and the Cloud, Automating Real-World Tasks with Python (2023)
- Networking Essentials, Cisco (Apr 2023); Introduction to Git and GitHub (Mar 2023); Technical Support Fundamentals (Dec 2023)

LANGUAGES

English (proficient), Urdu (highly proficient), Pashto (native)
