PROFILE

Product manager and automation engineer working on AI agents. At Agile Loop, a UK and KSA registered AI company, worked remotely on autonomous computer-use agents for Lenovo AI laptops and Qualcomm: first leading a 10-person team that collected and annotated 20,000+ agent tasks, then managing product for SAM and SAM-X. Before that, four years on Linux and Windows servers, databases and telecom systems. Since 2026, building WhatsApp AI agents, RAG chatbots and web apps for clients in Pakistan, the GCC, the US and Australia through Sequence Automate.

CORE SKILLS

AI & Automation: Autonomous AI agents, computer-use agents, RAG pipelines, LLM tool calling, LangChain, LangGraph, n8n, WhatsApp Cloud API, prompt engineering

Product Management: Roadmaps, PRDs, user stories, POC delivery, prioritisation, client reporting, UAT

QA & Data: Test planning, test cases, regression testing, bug tracking, data collection, data annotation, dataset QA

Development: Python, Next.js, Supabase, REST APIs, third-party API integration, SQL, Git

Infrastructure: Linux and Windows Server administration, database backup and recovery, system monitoring, networking

PROFESSIONAL EXPERIENCE

Sequence Automate *Islamabad, Pakistan | Remote clients* **Apr 2026 – Present**

Founder & AI Automation Engineer

- Delivered WhatsApp AI agents, RAG chatbots and custom web apps for 3+ clients in Pakistan, the GCC, the US and Australia.
- Run each project end to end: scoping with the client, solution design, build, API integration, testing and handover.
- Built VerifyOps, a field-service operations platform for HVAC, electrical and plumbing businesses, with finance and invoicing built in.
- Stack: n8n, LangChain, LangGraph, Next.js, Supabase, WhatsApp Cloud API, Python.

Agile Loop *Remote | UK & KSA* **Aug 2023 – Jan 2026**

Product Manager Apr 2024 – Jan 2026

- Led product for SAM Desktop, SAM Browser and SAM-X, autonomous computer-use agents built for Lenovo AI laptops and Qualcomm.
- Prototyped TERA, an AI agent that builds mobile apps from plain-language prompts.
- Ran the SAM team day to day: set priorities, tracked delivery and reported progress to leadership and the client.

QA Lead & Data Acquisition Lead Aug 2023 – Mar 2024

- Led a 10-person data team that collected and annotated 20,000+ tasks used to train and test computer-use agents.
- Built and quality-checked training data for SAM Desktop and SAM Browser, and worked with the Mind2Web, OSWorld and Orca datasets.
- Wrote test cases and logged agent failures on real on-screen tasks, including a Perplexity-style web search agent.
- Reviewed annotation quality across the team and fed failure patterns back to engineering.

Apollo Telecom *Islamabad, Pakistan* **Aug 2022 – Oct 2023**

Senior Support Engineer Feb 2023 – Oct 2023

- Promoted after six months. Covered the support desk day to day and trained new engineers on tools and escalation steps.
- Took client escalations from diagnosis to fix and wrote root-cause notes for the team.

Technical Support Engineer Aug 2022 – Jan 2023

- Monitored servers and telecom systems, including Huawei IVR platforms, and worked faults through to resolution.
- Resolved client tickets and documented fixes for the support team.

Menzies-RAS *Islamabad, Pakistan | via Apollo Telecom* **May 2020 – Aug 2022**

IT Engineer

- Supported IT for Menzies-RAS, the airport ground-handling joint venture of Menzies Aviation.
- Maintained Linux and Windows servers: patching, user access, monitoring and uptime checks.
- Ran database backups and restores and kept routine maintenance on schedule.
- First point of contact for application faults and user issues.

Sukh Chayn *Islamabad, Pakistan | via Apollo Telecom* **Feb 2019 – May 2020**

Linux Administrator

- Administered Linux and Windows servers for a real estate developer, from setup and updates to access control.
- Maintained company databases with scheduled backups.
- Supported staff on business applications and network access.

KEY PROJECTS

SAM Desktop & SAM Browser *Product Manager & QA Lead* **Agile Loop, for Lenovo**

- Autonomous AI agents that operate desktop apps and web browsers on Lenovo AI laptops from plain-language commands.
- Owned features, research, architecture input, testing, QA, training data and client reporting, and led the team.

SAM-X *Data, Testing & QA* **Agile Loop, for Qualcomm**

- Computer-use AI agent proof of concept for Qualcomm. Ran data collection, testing and QA, and shipped feature improvements.

TERA *Prototyping, Architecture & QA* **Agile Loop**

- AI agent that builds mobile apps from plain-language prompts. Prototyped the agent flow, shaped the architecture and ran testing.

Smartcard Navigator *Architect & Developer* **Client project**

- RAG assistant that answers credit-card product questions from bank documents. The client used it in demos to banks.
- Built document ingestion (chunking, embeddings, vector search), answers grounded in source documents, and REST API endpoints.

Travello AI *Architect & Developer* **Own product**

- AI travel agent that searches and books hotels, suites and flights through chat.
- Integrated flight and hotel booking APIs over REST, using LLM tool calling to search, compare and confirm bookings.

EDUCATION

Bachelor of Engineering (BE), Electrical Engineering *NUML, Islamabad* **2022**

National University of Modern Languages. Relevant coursework: Data Structures, Object-Oriented Programming, Computer Networks, Control Systems.

CERTIFICATIONS

McKinsey Forward Program *McKinsey & Company* **2025**

Google IT Support Professional Certificate *Google (Coursera)* **2023**

CCNA Training *NAVTTC (National Vocational and Technical Training Commission)* **2023**

Linux Essentials *Virtual University of Pakistan* **2022**

LANGUAGES

English (professional) | Urdu (fluent) | Pashto (native)
